College Fest

A lot goes into organizing a successful college festival. Though some determinants are more important than the others, the management of the event from end to end requires serious planning and execution. The team of students for each festival decide the vision and mission and then work on that layout. They decide a hierarchy, select their team members, project a budget, collect funds and, allocate and manage it. All parts of the events from Organizing to financing to managing it is done by students with minimum interference from teachers. This gives them a great learning experience and exposure to the outside world. Below is the glimpse of our previous College festival.
